ARIZONA
K-12 CENTER

Panning: Sweeps the camera across the face or photo

- ~ Select a photo
- ~ In Photo Settings Select Ken Burns Effect
- ~ Click Start
- ~ Click the pic in the monitor and drag it to where you want it to start
- ~ Click End
- ~ Drag image to where you want it to end
- ~ Move the duration slider to set length of pan
- ~ Click "play" to see how it looks
- ~ Click "Apply" when good

Order of Process

1. Import voiceover
2. Import photos or video clips
3. Import soundtrack
4. Add titles, transitions, etc.
5. Share project

Zooming: Appears as though the camera is moving into or away from the photo

In Photo Settings:

Select the Ken Burns Effect

- ~ Select a photo
- ~ Click Start
- ~ Move slider to select starting spot, Click End
- ~ Move slider to where you want zoom to end
- ~ Move duration slider to set length of time for zoom
- ~ Click "Apply"
- ~ The photo appears at the end of the movie—you can move it anywhere you would like it

Process: Begin in Clip View

- ~ For Video: Add Video Clips (after importing) by dragging from Clips Pane to Clip Viewer
- ~ For Photos: Choose "Media" and choose photo or multiple photos, select photo
- ~ Decide on Ken Burns effect-the default is On, and 5 seconds, click apply or drag
- ~ Drag photos to Clip Viewer
- ~ Rearrange photos as you see fit
- ~ Pan or Zoom, extend time?
- ~ Add Title-on clip or black (or color)?
- ~ Add Transitions
- ~ Add Soundtrack

Things to think about:

The 7 elements- especially pacing, and economy

Also: Let the story breathe
